algosec

Secure application connectivity.
Anywhere.

Discover more about AlgoSec

Discover who we are

AlgoSec prioritizes application security with **automated network and application connectivity management**, to help streamline security operations and ensure compliance.

What sets AlgoSec apart?

In addition to our network policy management and change management automation capabilities, **AlgoSec resides at the intersection** of your business infrastructure, security policies and applications. With AlgoSec, a customer will be able to **visualize application connectivity** seamlessly across all environments, automate connectivity changes securely, ensure continuous compliance, and effortlessly discover and manage risks.

Discover your customer's needs

What are your customer's main challenges?

- **broken visibility** of application connectivity

- **increased risk** and **compliance breaches** with regulations

- **slow application changes** and **complex change control processes**

Discover outcomes with AlgoSec

AlgoSec delivers:

- **Application visibility** by providing application discovery for reliable, estate wide mapping

- Reduced risk and breaches with **application compliance** awareness, risk mitigation and remediation

- **Removal of application delivery bottlenecks** with intelligent application change automation.
